

Our Commitment to Communities

Pembina Pipeline Corporation is a leading transportation and midstream service provider. For over 60 years, we have been safely and reliably connecting oil and gas production to markets that need it.

Communities put their trust in Pembina, allowing us to operate in their backyards. We honour that trust by building long term relationships with the communities where we live and work. We work hard to understand local perspectives and address any potential social impacts of our operations. We proudly participate in local events, engage with Aboriginal communities and give back through Pembina's Community Investment program.

Meaningful Consultation

Before we begin a project, we meet with local communities, landowners and other stakeholders affected by the proposed development.

There are several ways we engage with communities. We encourage conversation at open houses, community meetings, or face-to-face conversations.

Our conversations with local stakeholders cover many topics, including:

- Where we place our pipelines;
- Steps we take to minimize disruptions to the environment;
- Our use of local labour and businesses; and
- How we can make a positive difference through our Community Investment program.

Indigenous Relations

We realize the success of our projects is directly tied to the support of our neighbours, many of whom are Indigenous.

We take the time to get to know the Indigenous communities near our operations to learn and understand their perspectives. We provide information about our operations and projects, and answer questions that emerge.

Meetings with Indigenous communities are also an opportunity to explore how we can work together on health, education, training, employment and business development opportunities.

Community Investment

Through our Community Investment program, we give back to those living in the locations where we operate.

We focus our investments on:

Education

We fund education, skills training and capacity-building opportunities so that today's learners can become tomorrow's leaders.

Environment

We believe in building for the future while protecting the present. We place an emphasis on environmental conservation, stewardship and sustainability through projects that foster land, wildlife, water protection and conservation.

Safety

Safety is at the very core of our work every day. We help communities access the tools and knowledge they need to live safely and support initiatives that promote safety awareness. We also help ensure first responders have the resources they need, including training and specialized equipment.

Community Building

We invest in events and spaces that bring people together to create a vital, welcoming community.

Wellness

We understand that communities thrive when they have access to exceptional health care, healthy options and recreation opportunities. Projects that support healthy lifestyles are high on our list, as are initiatives that strengthen medical and social services.

Our signature program, Fuel 4 Thought a partnership with Breakfast Club of Canada, ensures school-aged kids have a great start to their day with nutritious food. This program supports both our interests in education and health.

"With the dedication and commitment of Pembina, Breakfast Club of Canada continues to reach more children and youth in Alberta. Every school morning, Pembina positively impacts the lives of almost 1,000 students. Pembina is making a difference in the communities in which they operate and it proves to have a sustainable effect."

-Breakfast Club of Canada
